# A Functional Analysis of Consolidating the Navy and Marine Corps Recruiting Commands

This is a NAVAL POSTGRADUATE SCHOOL MONTEREY CA report procured by the Pentagon and made available for public release. It has been reproduced in the best form available to the Pentagon. It is not spiral-bound, but rather assembled with Velobinding in a soft, white linen cover. The Storming Media report number is A537083. The abstract provided by the Pentagon follows: In todays military, characterized by reduced budget authority and increasing worldwide commitments, synergy is required. Secretary of the Navy Danzigs plan for the future is to reduce costs and build a stronger and more effective Navy and Marine Corps team by increasing Navy/Marine Corps integration. The Navy and Marine Corps can no longer afford to maintain their insular and parochial attitudes and go it alone. The resulting savings from more effectively and efficiently utilizing resources would help fund readiness and modernization objectives. This thesis proposes merging the Navy and Marine Corps recruiting commands to reduce redundancy, increase efficiency, and identify resource savings. As a result of data comparison, redundancies were identified in many of the special assistant and support areas, such as Public Affairs, Legal Affairs, Inspector General, Financial Management, Logistics, Manpower, Advertising/Marketing, and Information Systems. This snapshot of the structures, functions, and resources associated with the two existing commands can serve as a source of information for future studies.

Functional Area Manager (6)  However, the Navy and Marine Corps established lower approval  Command (SPAWARSYSCOM), Navy Marine Corps Intranet (NMCI)  The next preferred choice is consolidation into commercial or DoD  Enterprise IT Standard Business Case Analysis (BCA) Template.
