

Chronic Pain Relief: 12 Non-Medical Approaches

12 approaches to reducing chronic pain. Scripts are provided which can be used for: self-hypnosis, relaxation, meditation, mindfulness, focussing, changing the pains meaning, changing the feeling of the pain, and desensitization. Two special clinical techniques are also presented; one taken from EMDR (a reprocessing method) and the other from classical hypnosis (The Eye-Roll technique). Any of these techniques can be used at any time, anywhere. Most of them can produce benefits if used for 20 minutes, twice a day.

What I found surprised me: Many of these approaches really do seem to help, No one dies of low back pain, one back pain expert, University of Amsterdam Mainstream medicine has failed people with chronic back pain between four and 12 weeks) or chronic back pain (lasting 12 or more weeks).
