

Ape or Adam

In order to read the Bible, you don't have to deny what you have learned at school. The author of this book, Rev. William R. Van der Zee, tells us to keep both evolution and religion. He respects scientists in the field of biology for their expertise. However, he expects us to also respect what specialists in religious matters have discovered. Don't turn science into religion, he warns us, but let religion have its own say. The way he writes about God's involvement with His creation inspires us to open that old and treasured book of Genesis again. Genesis is not an old book on modern science. He teaches us to read it with totally different eyes; not the eyes of a scientist, but of someone who has an eye for all the things scientists have never been able to catch in their measuring devices. Suddenly, the assumed conflict between religion and science disappears. Let him explain to you what Adam stands for, plus all that comes with Adam: paradise, the snake, the ark... He does an excellent job. The monkey trial of Tennessee is over!

both These clues form the subject of *Ape or Adam?*, written by palaeontologist Robert Coram. The book takes the reader on a gentle journey that begins with the *Three Ways to Make an Ape Man*. Both apes and humans are found in the fossil record, but is there really compelling evidence for fossilized ape-men? The Bible tells us that God created Adam, but science says that we descend from apes. God asked from Adam and Eve to obey Him, by not eating from the tree of knowledge of good and evil (Genesis 2:16,17). When Adam and Eve stumbled and sinned, their relationship with God was
