

The New Revolution in Eye Care - Clear Eyesight with Powerful Eye Exercises

Learn to see more clearly with one of the most powerful and effective techniques used by behavioral optometrists, but in the privacy of your home. Using a concept known as plus lens training, the New Revolution in Eye Care walks you step by step in performing these potent eye exercises to improve clarity of eye sight, both up close and far away. Additional features include 20 effective eye relaxation exercises (found in most other eye exercise programs as their core program), complete and authoritative nutritional information for healthy visual function, information on eye diseases including nutritional intervention for macular degeneration, cataracts, dry eye, floaters, and much more. The introductory chapters explain in detail how the eye functions and how vision becomes worse over time, all with supporting documentation and references to clinical studies. Book comes with Snellen Eye Chart, Rosenbaum near vision eye chart, and astigmatic mirror chart. Plus lens training requires the use of inexpensive reader glasses for both near and far vision correction, not included.
